

PARKWOOD FAMILY AQUATIC CENTER

The PFAC will be permitted to operate during the COVID-19 public health emergency so long as the GNPD adheres to applicable Executive Orders and the following DOH restrictions:

- Ensure that all individuals maintain a distance of at least six feet from other individuals at all times, unless they are members of the same household or family unit;
- Ensure face coverings are not worn by individuals while they are in the water;
- Limit the maximum size of any single group of people on the premises or in the water to 10 individuals;
- Occupancy of the premises and pool should be limited to the number of individuals and groups who can be safely and appropriately spaced such that each individual and group is at least six feet away from others.
- Ensure different groups of people are separated by at least six feet on the premises or in the water, to the extent possible;
- Provide supplies for proper hand and respiratory hygiene, including soap, running water, and disposable paper towels; alcohol-based hand sanitizer containing at least 60% alcohol for areas where handwashing facilities may not be available or practical; and tissues and trash receptacles;
- Enhance cleaning and disinfection protocols, in compliance with all cleaning and disinfection

procedures from DOH, particularly cleaning and disinfection of high touch areas, including railings, lockers, and chairs, and maintaining logs on site that document date, time, and scope of cleaning and disinfection;

- Affix social distancing markers using tape or signs that denote six feet of spacing in commonly used and other applicable areas on the site (e.g. entrances, exits).

In addition to DOH guidelines, the GNPD used a number of resources to develop enhanced health and safety precautions to operate the PFAC this summer. Resources used were CDC healthy swimming and considerations for public pools during COVID-19, Pool and Hot Tub Alliance, and other local governments for best practices.

Health Screenings

Each member will receive a health screening prior to entering the PFAC. This will be done in two designated screening areas. Once the member passes the health screening, the member will be checked into the PFAC.

The health screening will consist of temperature reading using noncontact forehead infrared thermometers. Procedures of health screening are as follows:

- Member will be greeted at one of our two designated health screening zones by a staff member who will ask each member if the member has a cough, fever or shortness of

breath in the last 72 hours. If the answer is yes, the member will NOT be allowed to enter the PFAC until the member has been symptom free for at least 72 hours without the use of fever reducing medication.

- A staff member will take each member's temperature before the member is permitted access to the main PFAC entrance. If the member's temperature is above 100.0F, the member will be sent home and will not be allowed to return until at least 72 hours have passed without symptoms and without the use of fever reducing medications.
- If a temporal scan indicates temperature above 100.0F, the member will be asked to step out of line and will be given the option for staff to provide secondary standard thermometer temperature reading. If the member elects not to submit to the second reading, or if the second reading registers over 100.0F, then, in either case, the member will NOT be allowed to enter the PFAC until the member has been symptom free for at least 72 hours without the use of fever reducing medication.
- If a member with a temperature reading of above 100.0F has a family membership, then each family member will also NOT be permitted to enter the PFAC for indicated time parameters listed above.
- While checking member temperatures, staff will be required to wear the following PPE: face

mask and gloves to be changed upon contact with any individual.

Additional PFAC Modifications for Enhanced Health/Safety Precautions

- Face covering is required to enter the PFAC.
- Face covering must be worn when 6ft of social distancing cannot be maintained.
- Face covering may NOT be worn in the water.
- Face covering is required to be worn when entering restroom/locker room areas.
- No guests – Due to limited capacity the PFAC will be for members only.
- Showers will NOT be available at this time.
- Family groups must be 10 people or less in order to gather.
- Drinking fountains will be closed; however, guests may bring personal water bottles.
- Members are encouraged to use credit/debit cards only.
- Members are encouraged to bring their own hand sanitizer.
- Signage will be posted throughout the PFAC to remind patrons to stay home if they show symptoms of the virus; encouraging proper hygiene; social distancing; and to wear a face covering.

Enhanced Cleaning Plan

Staff will engage in enhanced cleaning efforts

regularly at the PFAC. The GNPD has added one-hour time blocks for deep cleaning twice a day between member sessions when the facility is closed. GNPD will provide onsite cleaning staff during all operation hours that will continuously monitor and disinfect frequently used surfaces.

- Staff will wear the following PPE while performing cleaning procedures: masks and gloves.
- Routinely clean, sanitize, and disinfect surfaces and objects that are frequently touched, especially bathrooms, chairs, garbage cans, handrails, door handles, etc.
- All cleaning materials should be kept secure and out of reach of members. Cleaning products should not be used near members.
